## Citations and explanations (Rule 70.7)

This Examination Report is based on the Written Opinion of 2 March 2001 (02.03.2001). Though the International Examining Authority raised objections regarding the clarity of claims 2 and 3 respectively the back reference of claim 14 the Applicant has submitted no response to said Written Opinion within the given time limit.

The subject matter of claim 1 concerns a switch circuit for controlling the supply from an electrical power source to a load. The switch circuit comprises transistors and a momentary switch. The dependent claims 2 – 14 concern advantageous features of the invention.

The documents cited in the search report address the subject-matter of the present application insofar as the documents describe power supply switching circuits with electronic switches. Though said documents also disclose combinations of electronic switches with a mechanical switch, none of the cited documents is able to anticipate the specific performance of the switch circuit as offered in the present application. Thus, the circuits of the cited documents define a state of the art not questioning the patentability of the present subject-matter.

Industrial applicability for a switch circuit is obviously established.

### VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. Claims 2 and 3 do not meet the requirement of clarity because it is not defined which one of the two transistors (Q2 or Q3) of the electronic switching device is a thyristor device (PCT Article 6).
2. Dependent claim 14 is not referred back to the previous claims in the most practical way possible. The arrangement of dependent claims must be one which enables the association of related claims to be readily determined (PCT Rule 6.4(c)).
3. The features of all the claims should be followed by reference signs in parentheses (PCT Rule 6.2(b)).
